

**Drainage District 118**  
**March 6, 2006**

Motion by Schoer, second by Sorenson to accept, as trustees of the Clay County Drainage District #118, the petition delivered March 3, 2006 signed by property owners requesting a study and preparation of a report, with recommendations, to improve the capacity of the main tile lines of the drainage district with the existing assessment schedules rather than reclassifying the district. It is further requested that Clay County Engineer Scott Rinehart and Drainage Technician Frank Rouse conduct the study as requested.

Motion carried.
