FOR IMMEDIATE RELEASE
March 12, 2019

Clay County offers free testing for private well water

Clay County is providing an opportunity for private well owners and tenants in the county to have well water tested for certain forms of bacteria, nitrite/nitrate and arsenic. Through the Iowa Private Well Program, a county sanitarian will come to your home and collect water samples for you completely free of charge. During the months of April and May 2019, the county sanitarian may also ask for permission to collect an additional sample to test for other specified contaminants in your water.

Water samples from your well will be sent to the State Hygienic Laboratory at the University of Iowa for testing. Results will be sent to you by the county sanitarian. Well water that is safe for consumption, as well as many other uses, is important for the health of many Iowans. This testing program is part of a study at the University of Iowa and an excellent chance for well owners in Clay County to learn more about the quality of water in your wells.

For more information, contact Tammy McKeever, at 712-262-8165 or tmckeever@co.clay.ia.us.

Additional information about the Iowa Private Well Program is available online at iowawell.org or by contacting the State Hygienic Laboratory at 319-467-4503 or shl-gtc@uiowa.edu.
